

Notes to kiosk (room work)

Pavilions open to views, often built in remote and beautiful locations.

Kiosks where intrepid travellers revive immersed in the ordinary culture and nature of place.

Kiosk, a kind of paradox to mediate the sublime, a human contract and play to reflect a reticent symbiosis between nature and a culture that takes care of it.

Kiosk: a place to recapitulate journeys before venturing further, before returning home.

Someone offers conviviality, refreshments, maps, souvenirs.

Wilderness, waterhole, oasis, welcome, if well come.

Old urban kiosks remain: corner of a park, hole in a wall.

Open: Closed.

New structures fold to the diurnal rhythms of city life.

Refreshments, flowers, gossip, news....
